

Introduction

Captain Jupyter

Abstract

This is my abstract!

Keywords jupyter-book, something-else

I am a book about ... something! Wikipedia has [information about books](#): hover over the link for more information.

Note

Books are usually written on paper ... But Jupyter Book can create *websites*!

If you sold 100 books at \$10 per book, you'd have \$1000 dollars according to (1). If instead you publish your Jupyter Book to the web for free, you'd have \$0 dollars!

$$x \times y = z \tag{1}$$

Sometimes when reading it is helpful to foster a *tranquil* environment. The image in [Figure 1](#) would be a perfect spot!

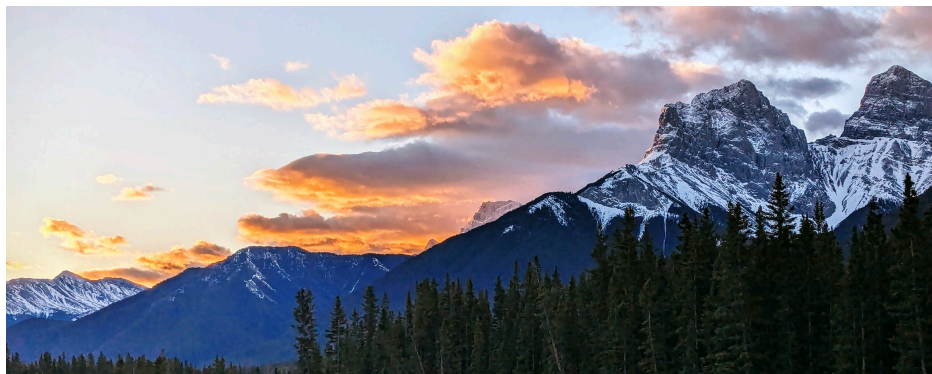

Figure 1: A photograph of some beautiful mountains to look at whilst reading.
